2019 Gender Pay Gap Report

Fresenius Medical Care Renal Services UK Ltd has today published its Gender Pay Gap report which shows that we have no significant gender pay gap between our male and female employees.

The figures attached (where there is a negative figure) show that female employees fair slightly better than males colleagues in some areas

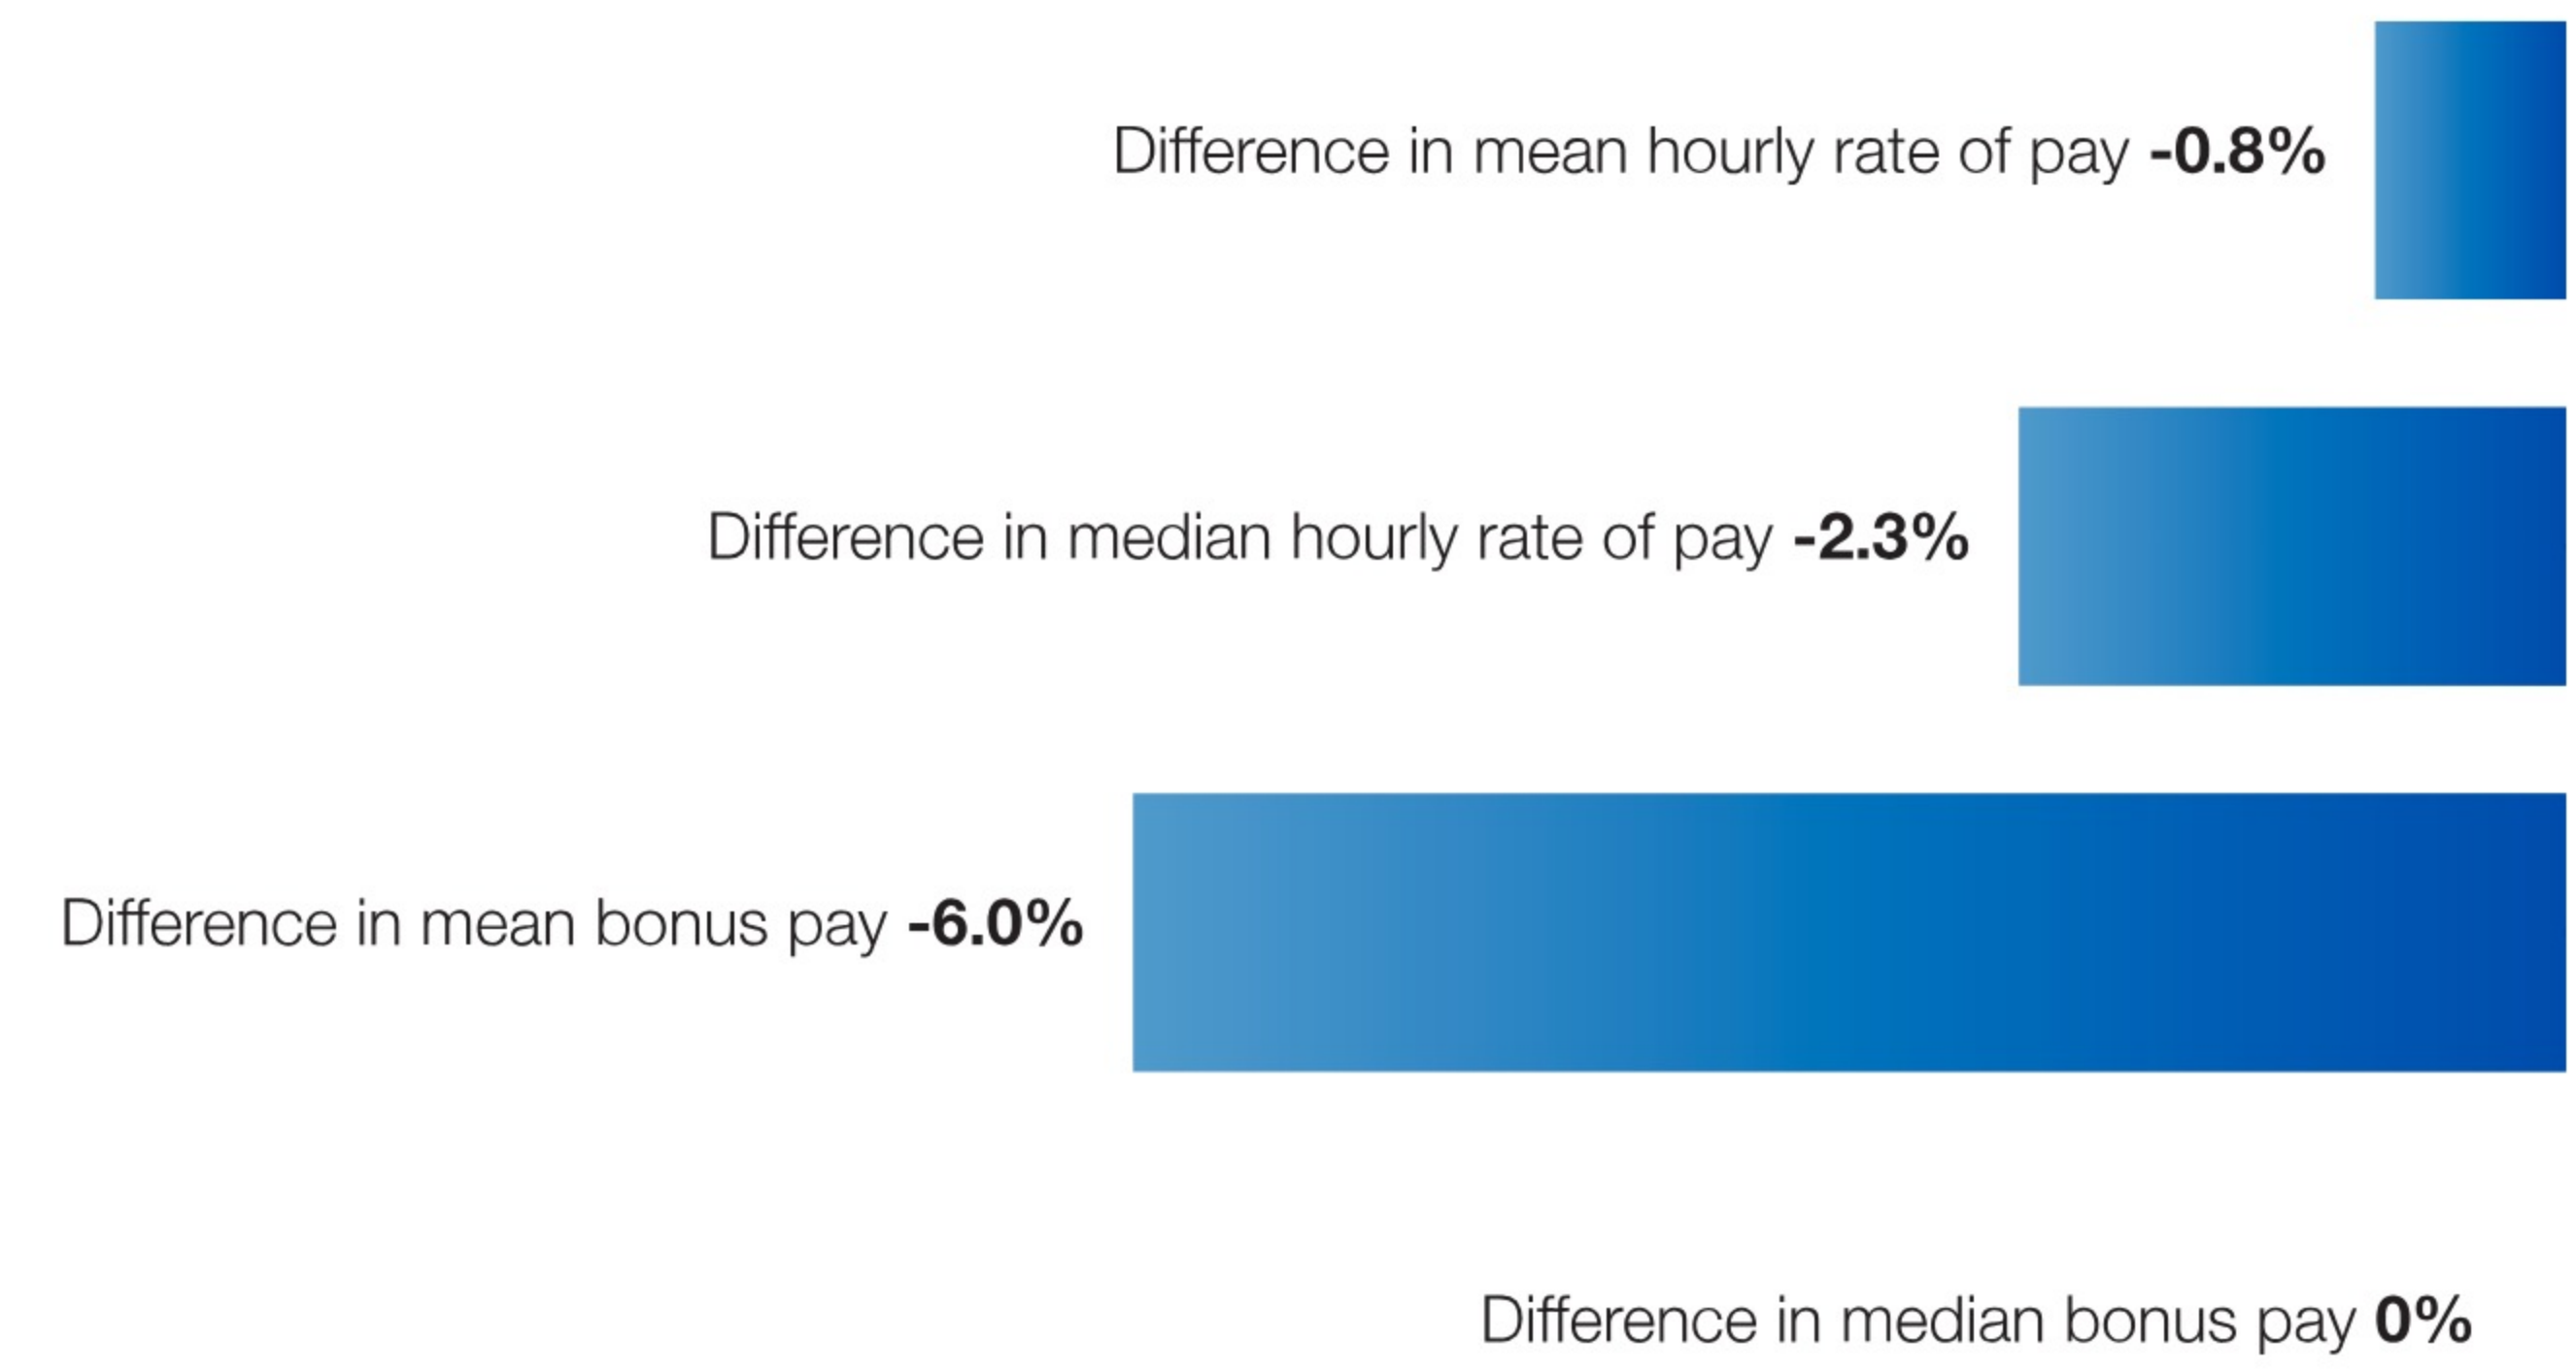

The majority of our employees are nurses and more females work as nurses which is reflected in our data.

I confirm that our data is accurate.

Antony Mazzei
Chief Operating Officer
 UK & Ireland
